Any fixture unit rating not addressed in this table shall be calculated pursuant to the current State Plumbing Code.

Total Fixture Unit Value = _____
 Divided by 16 = _____ EDU*
 (Round to the nearest 1/10th)

*EDU = Equivalent Dwelling Unit

- ¹ Count the greater of either the number of floor sinks or the units that drain into them but not both.
- ² Fixture unit values for garbage disposals less than ¾ h.p. installed in non-residential applications shall be based on the proposed use of the facility. Uses associated with commercial food processing, preparation, handling, or group food services (cafeterias) shall be charged 16 FU. Uses for individual employee support (i.e., employee lunchrooms) shall not be charged separately.

The Parks and Recreation SDCs for a particular non-residential development are determined by:

1. dividing the total building space (square feet) in the development by the number of square feet per employee (from the above Table), round to the nearest one-tenth, and
2. multiplying the result (from Step 1) by the SDC's Per New Employee rate.
